20 mph Zones!

Communism via the backdoor!

As people get personally affected by this 20mph nonsense they will hopefully react.

1. When their order from Amazon or eBay doesn't arrive on time due to the delivery van having to go at a snails pace.
2. When their post is late due to the mass snarl up this is going to cause.
3. When their local shops and high street shopping disappears. Local businesses will go under due to the loss of trade. The first nail in the coffin for small independent shops was introducing car parking charges. The 20 mph zones will be the final nail in the coffin for small business.
4. When high street local shops become housing in readiness for the proposed fifteen minute ghettos. To restrict travel and enable governments to lockdown individuals for whatever spurious reason they choose.
5. When supermarket prices shoot up even more as deliveries arrive later as the 20mph may have a domino effect. Also supermarket shelves may also become a little sparse.
6. When Cyclists get cut up due to frustrated motorists trying to overtake at the low speed and not being able to safely get out of the way of the cyclist in time. In a 30 mph zone they can safely overtake cyclists, not in a 20 mph zone.
7. When vehicles that are not designed to travel at 20 mph on cold mornings pump out far more pollution as their engines take far longer to warm up. Most people won't be able to afford an electric Noddy car that's as environmentally friendly as an oil slick due to the use of lithium batteries!
8. When even more speed cameras are set up that are nothing to do with safety and everything to do with revenue. People are beginning to realise all this nonsense is nothing to do with safety nor the phoney environmental agenda. It's everything to do with control by multinational lobby puppets commonly known as government! Whose job is to raise revenue via taxes to pay the ever inflating usury scam, a national debt that doesn't exist!
